

GL8001

Single Decontamination Shower

Lightweight and quick to deploy, the inflatable Single Decontamination Shower range allow for rapid response.

Fully inflatable, these Decontamination Showers can be set up in a matter of minutes, and will stay standing without continuous inflation. With no mechanical framework the shelters are lightweight to transport and compact to store. The Decontamination Showers come in two different styles, single with gloves or single without gloves.

Optional raised floor panels prevent contact with contaminated shower wash-off, which is collected in a PVC chemically resistant sump. Sleeves for pumped extraction of contaminated water are included as standard.

Showers can be used on hard or soft standing, and guy ropes are provided for securing in position during inclement weather.

- Light weight and compact
- Rapid Inflation and deployment
- Low Maintenance
- Integral multi-nozzle shower systems for wash and rinse
- Wash brush hose connection fittings
- Clear PVC Doors
